PROFILE

Software engineer specialising in **React / Next.js / TypeScript** and AI systems (**PyTorch, TensorFlow, LangChain**). Hands-on production experience with REST APIs, containerised microservices (**Docker**) and **CI/CD** pipelines. Driven by product impact, scalability and software quality in constrained environments (healthcare, national-scale systems).

WORK EXPERIENCE

Software Engineer — Contract Nov–Dec 2025

Centre Hospitalier de Bagnols-sur-Ceze, France

- Built a **React / Next.js (TypeScript)** medical traceability platform for full endoscope lifecycle tracking, compliant with national HAS standards.
- Developed REST APIs in **Node.js / TypeScript** and an **OCR** pipeline (Python, OpenCV) for automated form digitisation.
- **PostgreSQL** database (Supabase) with complete audit history and **Docker** deployment.

Full-Stack Developer — Apprenticeship Oct 2024–Jul 2025

Ibtikar Technologies, Nouakchott

- National platform **Taazour**: REST APIs with **Next.js / Express.js**, **React / TypeScript** interfaces, containerised microservices architecture.
- Co-developed a **liveness detection** system (anti-spoofing): CNN (**PyTorch + OpenCV**) classifying real faces vs spoofing attacks (photos, replay videos).
- **CI/CD** pipelines (GitHub Actions), **Docker** deployments, strict **TypeScript** refactoring.

IT Support Intern Aug–Sep 2024

Kinross Tasiast, Mauritania

- Network maintenance and technical support for 50+ users in an industrial environment.
